# NEW HORIZON COLLEGE OF ENGINEERING

## VISION

## MISSION

- To emerge as an institute of eminence in the fields of engineering, technology and management in serving the industry and the nation by empowering students with a high degree of technical, managerial and practical competence.
- To strengthen the theoretical, practical and ethical dimensions of the learning process by fostering a culture of research & innovation among faculty members and students. To encourage long-term interaction between the academia and industry through their involvement in the design of curriculum and its hands-on implementation.
- To strengthen and mould students in professional, ethical, social and environmental dimensions by encouraging participation in co-curricular and extracurricular activities.

## QUALITY POLICY

To provide educational services of the highest quality both curricular and co-curricular to enable students integrate skills and serve the industry and society equally well at global level

## VALUES

- Academic Freedom
- Integrity
- Inclusiveness
- Innovation
- Professionalism
- Social Responsibility

# ABOUT DEPARTMENT

Welcome to the Department of Electrical & Electronics Engineering (EEE) at New Horizon College of Engineering (NHCE), Bangalore. EEE is one of the prestigious branches of Engineering and one among the oldest departments of NHCE-Bangalore started in 2001. The EEE Department has been playing a vital role in producing engineers and technologists of high caliber ever since it was established in the year 2001. The Department is accredited by NAAC with 'A' Grade and accredited by NBA. The vision of EEE Department is to create contemporary Engineers, innovators and entrepreneurs to make a better nation and in turn, a better world. A critical investigation and innovation into the modern state-of-art and cutting edge technology lead to the fact that an electrical graduate fits better in today's competitive world.

- The strength of the department is highly qualified faculty members with expertise in various fields of electrical engineering, state of art laboratory facilities. The department is inclined towards bridging the gap between Industry and academia by collaborating with Multinational Companies in the field of Electrical Engineering.

- Indo-French Center of Excellence in Electricity, Automation and Energy (IFCEEAE) is one such initiative evolved through "MoU" with French Ministry of National Education and Schneider Electric India Pvt. Ltd., The main objectives of IFCEEAE are

- To train the students of all streams of engineering in automation field

- To facilitate interdisciplinary and applied research with a focus on innovative product development

- To provide excellent career opportunities to students through exchange programs with French Universities, industrial training, innovative learning and R & D activities especially in the areas like Smart Grid, Internet of things (IoT), Energy Management Systems, Embedded systems, Supervisory Control and Data Acquisition (SCADA) and industrial automation.

- The Department nurtures the young minds beyond the curriculum by facilitating technical clubs in promoting technical events, community development/society impact and universal value/ethics programs. In supporting to this, Department of Electrical & Electronics Engineering has established Institute of Electrical and Electronics Engineers (IEEE) – Power Electronics Society (PELS) Student Branch Chapter (Geo-Code: SBC66131) which is the non-profitable, world largest technical professional organization for the advancement of technology. The students have a greater exposure and flexibility in campus placements in core industries, IT sectors and Public Sector Units (PSU).

## VISION

To evolve into a centre of excellence in Electrical and Electronics Engineering for bringing out contemporary engineers, innovators, researchers and entrepreneurs for serving nation

## MISSION

- To provide suitable forums to enhance the teaching-learning, research and development activities.
- Framing and continuously updating the curriculum to bridge the gap between industry and academia in the contemporary world and serve society.
- To inculcate awareness and responsibility towards the environment and ethical values.

## PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO 1: To provide good learning environment to develop entrepreneurship capabilities in various areas of Electrical and Electronics Engineering with enhanced efficiency, productivity, cost effectiveness and technological empowerment of human resource.

PEO2: To inculcate research capabilities in the areas of Electrical & Electronics Engineering to identify, comprehend and solve problems and adopt themselves to rapidly evolving technology.

PEO3: To create high standards of moral and ethical values among the graduates to transform them as responsible citizens of the nation.

## MESSAGE FROM PRINCIPAL & HOD

### **Dr. MANJUNATHA PRINCIPAL, NHCE**

Dear all, In our college, we and our faculty always think we need to teach beyond curriculum to make our students 'Industry Ready'. Recent observations made by many stalwarts in the industry indicate the fact that most Engineering Graduates out of colleges are not employable. NHCE has always been in the forefront in ensuring that students are employable. It gives me immense pleasure to write a few words as prologue to the in-house 2022 Newsletter of the EEE Department. The issue is designed to present the events that have occurred in the department makes this newsletter resourceful and informative. I congratulate all the contributors and the editorial board for bringing out such a nice issue. Happy Reading.

### **Dr. S. SUJITA Prof. & HOD EEE, NHCE**

Dear readers, I feel happy to release Newsletter titled as "Currents" 2022. Our editorial team has done an appreciable job in reporting all the events which have taken place in the Department over a time period of seven months. To all your notice, our Newsletter is presenting you the success of major events witnessed by students, faculty and external participants of Electrical Engineering fields. The objective of the Technical Newsletter is to provide information about involvement, inspiration and dedication in diversified areas of Electrical Engineering from students, faculty, parents and alumni- with a timely and honest portrait of our Department activities. This has made an earnest attempt in this direction and all the credit for its success falls upon faculty and students who have worked with dedication and enthusiasm to bring this forward. I convey my regards to all the readers.

### **EDITORIAL TEAM FACULTY ADVISOR**

## CLUB EVENTS

### QUIZCODE

**NEW HORIZON**  
COLLEGE OF ENGINEERING

**QUIZCODE**

Round 1- Quiz  
Round 2 - Basic coding questions

Event prerequisites  
- Basic algorithm writing  
- Basics of C

Date - 13-07-2022  
Time- 12:10pm - 1:10pm  
Venue - B203

Convener  
Dr. M Mahesh  
Faculty Coordinator  
Dr. S Sujitha  
Event Coordinators  
Harshika (9523728875)  
Shashank Joshi(9916347248)  
Sudeep (9535190119)

The event aimed to encourage students to become skilled at the basics of coding, and it was the continuation of the previous event, CODOPIA "A Future Prospective." The event tested participants on the concepts taught in the previous event.

Approximately 30 students participated in the event, and they were able to benefit from the knowledge and skills imparted during the event. The event was organized in a manner that made it interactive and engaging for the participants.

The event was structured in a way that tested the students' knowledge of the basics of coding. The participants were able to apply the concepts they had learned in the previous event and demonstrate their understanding of the topic.

Overall, the event was a great success in achieving its objective of encouraging students to become skilled in the basics of coding. The students who participated in the event were able to improve their coding skills and deepen their understanding of the concepts taught in the previous event.

The organizers deserve appreciation for their efforts in organizing such a useful and informative event for the benefit of the students. By providing such events, the organizers are helping to create a culture of learning and skill development among students, which will benefit them in the long run..

## SIMULATE WITH US

The aim of the event was to help B.E students of NHCE get familiarized with basic electrical core concepts and a few simulation software like LT-Spice, Proteus, and MATLAB/SIMULINK. The event was organized jointly by the E-SOFT club and IEEE PELS Bangalore Chapter.

The event was a great success as it benefited 34 participants who were able to learn about simulation in electric circuits. Participants were able to improve their technical knowledge and gain insights into the applications of these software's.

The event was well-structured and included various activities and sessions that provided an excellent learning experience for the participants. The organizers were able to provide the participants with the necessary resources and guidance to help them learn about simulation software in a fun and interactive way.

Overall, the event was a great success and achieved its objective of helping the participants get familiarized with simulation software and improving their technical knowledge. The E-SOFT Club and IEEE PELS Bangalore Chapter deserve appreciation for organizing such a useful and informative event for the benefit of B.E students of NHCE.

## INDUSTRIAL VISIT

During our industrial visit to Kaiga Atomic Power Station, you were able to learn about various aspects of nuclear power and its generation. we learned that nuclear power is a form of clean energy that does not emit greenhouse gases and is an effective way to mitigate climate change.

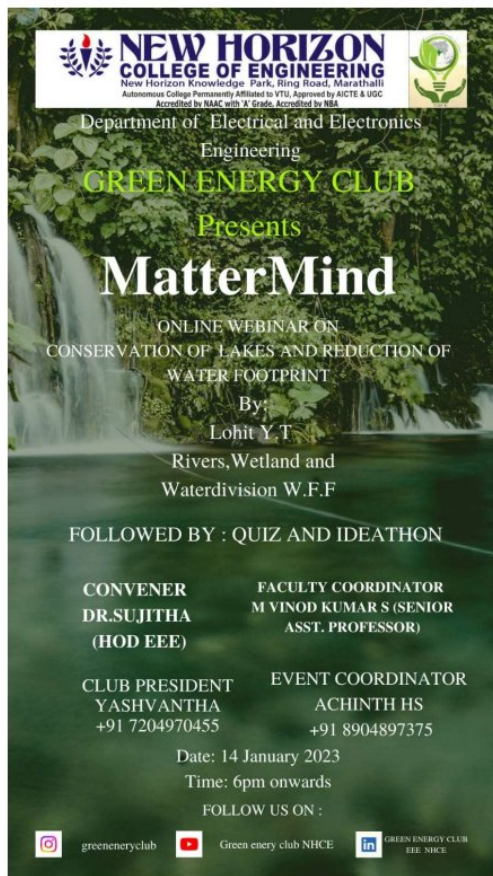

we were introduced to the process of nuclear power generation, which involves the fission of uranium atoms, releasing a large amount of energy. The reactors at Kaiga Atomic Power Station are pressurized heavy-water reactors (PHWRs), which use heavy water as a coolant and moderator.

we learned that safety is of utmost importance in a nuclear power plant and that Kaiga Atomic Power Station has comprehensive safety measures in place, with multiple layers of protection to prevent accidents. we were impressed by the advanced technology and rigorous procedures in place to ensure the safety of workers and the surrounding community.

we also learned about the safe storage and disposal of nuclear waste generated at the plant. we witnessed the secure storage facility and the measures taken to dispose of the waste safely.

Overall, visit to Kaiga Atomic Power Station gave you a comprehensive understanding of nuclear power generation and the various technologies and safety measures involved. we came away with a greater appreciation for the importance of clean energy and nuclear power's role in meeting India's energy needs.

## Mattermind Event (Seminar + Quiz)

The event was attended by around 60 students from different colleges and departments who were interested in exploring green energy and sustainability. The participants were engaged in various activities that highlighted the importance of renewable energy sources and how they can be used to address environmental challenges.

The guest speaker, Mr. Lohit Y, delivered an inspiring talk on the latest developments in green energy and how they can be leveraged to create a sustainable future. He emphasized the importance of adopting a holistic approach towards energy conservation and how green energy can be integrated into our daily lives.

The event also featured interactive sessions, group discussions, and presentations by the participants on various topics related to green energy. The

participants were given an opportunity to showcase their creativity and innovation in designing sustainable energy solutions.

The event was concluded with a vote of thanks by Mr. Vinod Kumar S, the Green Energy Club Co-coordinator, who expressed his gratitude to the guest speaker, participants, and everyone who contributed to the success of the event.

In conclusion, the Matter Mind Event of Green Energy Club organized by the Department of Electrical and Electronics Engineering at the New Horizon College of Engineering was a highly engaging and informative event that provided a platform for students to explore the potential of green energy and sustainability. It was a great success and left a lasting impression on all the participants.

## Cleanliness Drive at Jakkur Lake

The objective of the event was to spread awareness about cleanliness in the surroundings, specifically near water bodies, as garbage pollution can harm aquatic life. The event was conducted by the Green Energy Club and started at 9:00 am and ended at 12:00 pm.

The participants left from college and reached the venue for the event. The organizers informed them about the agenda for the day. The participants were divided into groups and were given a specific area to clean. The focus was mainly on plastic and related materials as they can cause significant damage to the environment.

After cleaning the area, the garbage was dumped in a designated location. The participants distributed templates and had conversations with the people present there about the importance of cleanliness and how it affects the environment.

At the end of the event, the participants planted some plants to encourage the growth of vegetation in the area.

The event was a success as it achieved its objective of spreading awareness about cleanliness and its importance. The participants were able to make a significant impact on the environment by cleaning the area near the lake, and the distribution of templates helped to raise awareness among the local people about keeping their surroundings clean.

The Green Energy Club deserves appreciation for organizing such an event that not only helped to create awareness about cleanliness but also promoted the importance of taking care of the environment.

## TechPlay

@ucreateclub.nhce

U-Create club of the Electrical and Electronics department conducted an event TECHPLAY ON 13TH JANUARY. The session was hosted by Harshitha. R of the 7th Semester and started with a Welcome Note to our contestants, to all the students of the 3rd and 5th semesters students, and to the faculty of the electrical and electronics department. The event was preceded by a short talk by prof. Kodandapani of the electrical and electronics department. In his talk, he emphasized the importance of Innovation in the Electrical Domain. After which the event started with 30 enthusiastic participants. The event ran in Three rounds where in the first round they have to pick and speak on an electrical topic, the shortlisted members were moved to the second round. In which they had a circuit to block. A circuit was given and was asked to decode it. This was followed by an elimination round. The third round had similar to the second round where the

participants had to debug a code which was given by the ucreate members. Basically, it consist of a code that had errors and the shortlisted participants had to debug the code. which successfully led to the end of the three rounds of TECHPLAY. The participants from various departments actively participated in the event and had a great fun learning session. The students from other branches than the electrical branch got great exposure to Electrical Domain. At the end of this knowledge-oriented day, we came up with three brilliant Participants as winners decorating first, second and third place for whom the prizes were distributed by the faculty coordinator of the U-Create club prof. Kodandapani sir. The event ended with prize distribution and a vote of thanks. The inquisitiveness of all the participants led them to learn all the important aspects of electrical projects which will definitely help them to boost their technical skills indeed this was also an event where the participants used this opportunity to evaluate their knowledge.

THANKYOU
